

August 18, 2020

Residents and Families,

Unfortunately, today we have to report another beloved resident that had tested positive for COVID-19 died this morning. The community is saddened by the loss.

We received results this afternoon of another resident testing positive for COVID-19 on Country Lane, our memory care neighborhood. The individual was immediately moved into isolation upon notification of the test results.

We began another round of resident testing on Monday for Country Lane residents along with two other residents on isolation precautions. Team members were tested today and we hope to receive results starting tomorrow morning. It is possible a letter could be sent each day this week in order to meet this requirement.

There have been questions regarding when notification letters are sent to residents and families. We are required by regulation to notify all residents and interested parties within 12 hours of the notification of a positive test result. There is not a notification requirement for deaths, however we find this to be important to communicate.

Please do not hesitate to reach out with questions or concerns. We will answer them to the best of our ability.

Sincerely,

A handwritten signature in cursive script that reads "Jamie Paredes".
