

September 28th, 2021

Residents and Families,

We need to inform you that three residents who reside on Millcreek Drive tested positive for COVID-19. All residents community wide were tested yesterday evening and Millcreek residents were all given an additional point of care test today after the third resident become symptomatic and tested positive on a point of care test. If there are no positives from the PCR tests, then we will only test Millcreek again on Thursday. Mountain and Cottage do not need to test on Thursday unless someone is symptomatic, exposed or we have another positive. If there were to be a positive, then the testing starts again.

Unfortunately, Millcreek is only able to have outdoor visits for the next 14 days. Compassionate care visits will not be impacted.

Cottage Creek is able to continue indoor visits.

Mountain Chalet will only be able to have outdoor visits until 10/1, with the exception of compassionate care visits.

We are finalizing plans for the flu shot and for the COVID-19 booster with hopes of administering them as soon as next week.

Please do not hesitate to reach out with any questions.

Sincerely,

Jamie Paredes
Executive Director
